## Profile

---

Results-driven Flutter Developer with three years of experience in designing and implementing innovative mobile applications. I am highly skilled and motivated, seeking an opportunity to leverage my expertise in Flutter development to contribute to cutting-edge projects and play a key role in the success of a dynamic development team.

## Professional Experience

---

2022/05 – present  
Amman, Jordan

### Flutter Developer, DIGI SOL FZE

As a Flutter Developer at Digisol, I contribute to the development and enhancement of mobile applications. Specializing in Flutter, I design and implement cross-platform solutions that meet high standards for performance and user experience. Collaborating within a dynamic team, I play a key role in the successful launch and ongoing maintenance of applications, ensuring alignment with industry best practices and user expectations. My responsibilities include architectural design, feature development, problem-solving, and integration of cutting-edge technologies. My commitment to delivering quality software is evident in my contributions to the seamless functionality of Digisol's mobile applications.

## Education

---

2018 – 2022  
As Salt, Jordan

### Bachelor's degree in Computer Information Systems, AL Balqa Applied University - BAU

- We Developed a web site which clients can book their own tickets for their dated arrange trips.
- We used MySQL database in our project.

## Projects

---

2023/11

### Jadwal Education

- Class Schedule Upload:
- Streamlined the process for teachers at Digisol to upload their class schedules, providing efficient access for administration and supervisors.
- Quota Tracking:
- Implemented an organized system within Digisol's application for teachers to track timetables and scheduled educational content for each class.
- Absence Request:
- Introduced a feature in Digisol's application that allows teachers to efficiently request absences, streamlining the documentation process.
- Notices to Moderators:
- Implemented a notification system in Digisol's application to alert supervisors when an absence request is received, enhancing monitoring capabilities.
- Quota Compensation:
- Enabled automatic or manual organization of class make-up for other teachers within Digisol's application, considering schedules and needs.

2023/03

### United Brokerage

- Developed an innovative insurance application for individuals, cars, and public properties. This project enables users to comprehensively insure all family members and individual assets, including cars, houses, and companies. Contributed to the successful implementation of end-to-end insurance processes, ensuring a seamless and user-friendly experience for clients.

2022/11

### Hungry Bunny

- Led "Hungry Bunny" Mobile App Development:
- Led the development and implementation of the "Hungry Bunny" mobile application, a robust e-commerce platform specializing in food ordering.
- Engineered Intuitive Ordering System:
- Engineered an intuitive and efficient ordering system for "Hungry Bunny," enhancing the user experience from menu exploration to order placement and delivery tracking.
- Integrated Secure Payment Gateways:
- Integrated secure payment gateways into "Hungry Bunny" to ensure a smooth and secure transaction process for users.
- Collaborated Across Teams:
- Collaborated closely with cross-functional teams, including designers and backend developers, to deliver a highly responsive and feature-rich application.
- Successful Launch and Maintenance:
- Successfully launched and maintained the "Hungry Bunny" application, contributing to increased user engagement and positive customer feedback.
